

RF Transparent Concealment (RFTC) RF Transparent Concealment (RFTC) RF Transparent Concealment (RFTC)

“Listen to what is needed and Respond Fast.”

Project Case Study: Tierra Del Sol, San Diego, CA

This project required that we “design on the run” in order to make our screen wall line up with the base the GC would install. We worked closely with the installers to make quick changes along the way to accommodate last minute issues they discovered during the initial construction of the cell site.

Peabody RF Transparent Concealment (RFTC) is designed to be easy to install on-site. This allows you to save precious man-hours and reduce the project cost while freeing up installers to get to the next site.

Pictured Left:
Our RFTC enclosure

Our sectors bolt together from behind so they look great from the front and go together quick. We apply the texture and paint before it ships so you drop it in place and you're done. **FAST!**

Our RFTC enclosure in position on the roof

- Cellular Carrier approved
- RF tested and WiMax ready
- Full-service design and engineering
- Custom-made molded panels
- Fiberscreen™ (fiberglass) & Polyscreen™ (foam) products
- Easy to install on-site saving time and money
- Quick Connect Fiberscreen Enclosure
